

ORACLE SUSTAINABILITY

VIDEO TRANSCRIPT

Progress comes from within.
From focusing on the change you want to see in
the world
And making it a part of everything you do.
Every thought, every action, every reaction.

Progress is built in, not bolted on.
It comes from putting sustainable choices at the
core of your business
And truly moving towards your goals
For your business, your society, your world.

Progress thrives on collaboration.
From drawing on Accenture's deep industry
experience and sustainability knowledge
Powered by Oracle's innovative cloud
technologies
So you can accelerate, quantify, and transform.

It's easy to talk about progress
About turning insights into actions
Metrics into results
Reporting into realized value

But talking is one thing
And doing? That's another
That's why Accenture and Oracle offer more
than sustainability.
We're providing meaningful change
How do we get there?
By bringing you
Attainability.
