Being a **change agent** & an **evangelist**, are the **top skills** required for CDOs to be successful

Q: In your view what are the top 3 skills required for a chief data officer to be successful?

But today's CDOs face barriers to deliver on the value of their vision...

Lack of talent to operationalize, cultural/adoption, and lack of long-term funding are the top 3 challenges faced by CDOs

Q: What are the greatest challenges Chief Data Officer faces in delivering on data vision of the organization?

86%

of the CDOs/Acting CDOs are **involved in development** of their organization's data strategy...

Source: Accenture Research, MIT CDOIQ Survey, July 2021

Yet **responsibility for revenue generation** and **shaping the enterprise business strategy** observe the biggest gaps between the CDO's current primary role and an optimized role

	Current primary	Optimized for maximum value	Gap in Current vs. Optimized
Responsibility for shaping the enterprise business strategy and guiding business directions	29%	44%	-15%
Responsibility for revenue generation through creation of new or adapted business models	27%	44%	-17%

But positively, there's a shift in the market **elevating the role of the CDO** and highlighting its importance.

78%

Of CDOs assert their roles and responsibilities have **become more critical**, driven by the need for **competitive advantage**

Thank You
