

ACCENTURE APPRENTICE NETWORK, NORTHERN CALIFORNIA – MEET LALANI RENTIE

VIDEO TRANSCRIPT

Hi my name is Leilani Rentie I joined Accenture as a recruiting apprentice in august of 2019.

After I graduated high school, I attended college I was a athlete I played basketball and my major was kinesiology about a year and a half after being in school I was diagnosed with heart disease, and I had to have surgery for a pacemaker placement that transitioned and changed my career trajectory I had to look at what I wanted to do for career now I realized that recruiting was where I wanted to be coming from a heavy sales background and getting into recruiting me having no experience I went on different interviews before I went on an interview with Accenture and I heard a lot of notes that's where the apprenticeship came in this program was able to allow me to actually gain the experience and the knowledge for one year now as a recruiter I actually have a larger extensive network because I've helped people throughout the hiring process that is thanks to joining the apprenticeship program being a recruiting catalyst this opportunity really changed my life I was able to gain knowledge gain experience and now I'm in the career that I enjoy
