

LEED Green Building Education

Accenture Thailand
Bangkok office, FYI Center

Introduction

Accenture's Advanced Technology Center Thailand, located at FYI Center, is currently being assessed by LEED (Leadership in Energy and Environmental Design), with the goal of achieving LEED Gold for Interior Design and Construction Certification.

We are excited to share our journey of implementing design and construction that prioritize building efficiency, reduce operational costs, enhance asset value, and ensure the well-being, comfort, and productivity of our employees.

Our aim is to continually enhance efficiency, decrease carbon emissions, and create healthier environments for our people.

LEED

Green Education Items

- 01 Location and Transportation**
- 02 Water Efficiency**
- 03 Energy and Atmosphere**
- 04 Materials and Resources**
- 05 Indoor Environmental Quality**

01 Location and Transportation

Walkability and access to quality transit

Our strategy is to lower greenhouse gas emissions which are the largest contributor to climate change.

To encourage people to apply the strategy to life, our office is located where a variety of public transportation is available. This means less reliance on cars and a reduction in air pollution. Moreover, being within short walking distance of gyms, parks, shops, and restaurants makes our location convenient for everyone.

02 Water Efficiency

Water consumption reduction

Our objective is to decrease water usage in the office for sustainable water practices.

Acknowledging that clean water is a finite resource requiring careful stewardship, we have selected our fixtures to significantly reduce water consumption.

We expected to save 40% of water consumption compared to typical offices.

03 Energy and Atmosphere

Smart and efficient lighting control

At Accenture, we're dedicated to optimizing energy use and cutting building costs.

The lighting systems in our office are carefully designed to provide the right amount of light while conserving energy, utilizing daylight sensors, occupancy sensors, and efficient working hour controls. The careful selection and placement of lighting fixtures for further efficiency.

This specifically designed control guarantees that more than 35% of LPD (Lighting Power Density) is reduced from the baseline.

04 Materials and Resources

Reducing the use raw and virgin materials

At Accenture, we encourage the use of recycled materials and certified wood products to reduce our environmental impact. By recycling, we help turn waste into new products and decrease the need for virgin materials.

Our successful implementation includes using products and materials with more than 15% recycled content by cost.

05 Indoor Environmental Quality

Daylight access for everyone

As we spend most of our time in buildings, our workplace is designed to connect you with the outdoors, helping to reinforce your natural circadian rhythms, and reducing the use of electrical lighting.

By designing the office layout to incorporate daylight into the workspaces, we aim to create an environment that promotes well-being, productivity, and a more sustainable use of energy resources.

Thank You

About Accenture

Accenture is a leading global professional services company that helps the world's leading businesses, governments and other organizations build their digital core, optimize their operations, accelerate revenue growth and enhance citizen services—creating tangible value at speed and scale. We are a talent- and innovation-led company with approximately 733,000 people serving clients in more than 120 countries. Technology is at the core of change today, and we are one of the world's leaders in helping drive that change, with strong ecosystem relationships. We combine our strength in technology and leadership in cloud, data and AI with unmatched industry experience, functional expertise and global delivery capability. We are uniquely able to deliver tangible outcomes because of our broad range of services, solutions and assets across Strategy & Consulting, Technology, Operations, Industry X and Song. These capabilities, together with our culture of shared success and commitment to creating 360° value, enable us to help our clients reinvent and build trusted, lasting relationships. We measure our success by the 360° value we create for our clients, each other, our shareholders, partners and communities.
