Enterprise Sustainability Programme – Foundational Courses

Embracing Sustainability for Enterprise Growth

Empower your business: Unlock growth and savings with sustainability incentives

Why focus on sustainability now?

As Singapore pushes the sustainability agenda, companies need to consider ways to become more sustainable due to:

Savings: Increase cost savings and profits

Reduce expenditure on electricity or taxes

Create opportunities for new revenue streams through sustainable activities

Support: Capture value in the form of grants and incentives

Leverage on existing grants, incentives, and programmes offered by the government across industries

Standards: Remain compliant and competitive

Keep up to date with local and global policies

Remain attractive to changing customer preferences

Learning Objectives

✓ Understand global and local trends in reporting and learn how to take action through available support structures.

✓ Learn how to develop practices that mitigate the environmental impact of technology

✓ Expand your knowledge in key areas including Material ESG, GHG inventory, waste management, and sustainable supply chain through case studies.

✓ Embark on your organization's sustainability journey and broaden perspectives on solutions through valuable networking opportunities.

Facilitated learning directed towards helping you identify a green action plan
