

## INSPIRATION VIDEO TRANSCRIPT

What does an industrial revolution feel like?

Well, just like this.

Like this moment, right now.

It doesn't feel momentous,

Until we see it in the rear-view mirror.

And we don't feel its full impact,

Unless we have new intelligence to realize

it.

Intelligence changes, not just how we think,

But industry itself and the very products it

makes.

Intelligence is Industry's X.

The element that unlocks its full potential.

The potential for factories and plants to talk

to one another

across vast distances.

For manufacturing networks to run

themselves.

For products to be created virtually, to think

for themselves.

to learn every day.

Right now, we have the power

to make industry more impactful for the

world.

More efficient, more sustainable,

Inclusive, meaningful and safer.

We can drive change, fuel economies, and

improve lives.

Yes, this is what an industrial revolution feels

like.

Like the others that came before it.

Like the promise of technology and human

ingenuity.

First, we help you see it,

Then, we help you seize it.

So, you can always be ready for change.

Change that is here, today.

Welcome to Industry X.
